

YOUR NEW FACILITY MANAGEMENT SUPER POWER?

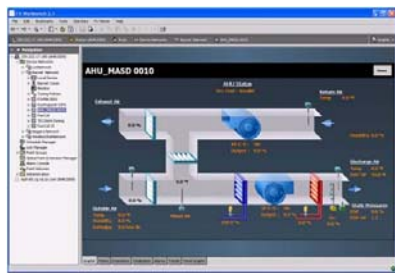

SEEING THROUGH WALLS...
FROM ANYWHERE!

With Facility Explorer, you can see beyond the supervisory level, deep inside your building system.

From there you can act on vital systems information, resolving problems faster and improving energy savings.

Now Johnson Controls has made facility management even easier with **FX Workbench!**

FX Workbench provides you with two sets of factory-designed, standard application graphics to include in your Web UI. One set is designed for viewing with a full-sized computer screen. The other set has been optimized for viewing

it from anywhere with an **iPhone®/iPod touch®** handheld device! You can be anywhere with your **iPhone®/iPod touch®** handheld device and **see** through the facility's walls!

FX Workbench is:

- **Mobile-** you can supervise your facility from the comfort of your own home
- **Convenient-** when you import a controller with a standard application, both sets of graphics can be **automatically generated!**
- **Cost-effective**
- **Versatile**
