

eSight®

Reduce energy costs with the most advanced, fully web enabled, M&T solution available on the market

eSight is a comprehensive and intuitive energy monitoring and targeting suite, providing an impressive range of techniques for managing all aspects of energy related data. eSight is fully web enabled and is available online or may be installed to site.

Data may be automatically imported to eSight from data loggers, BMS and SCADA systems, production systems, electronic billing data and spreadsheets. eSight already interfaces with most of the major systems manufacturers so integration with existing equipment couldn't be simpler.

eSight is a scalable product, suitable for use across any industry sector and companies of any size.

eSight Modules

Energy Analysis

Perform broad analyses of energy data including electricity analysis and league tables.

Financial Analysis

Manage supplier contracts, create and monitor budgets and analyse energy in terms of cost.

Invoice Validation

Validate invoices manually or automatically in bulk.

Procurement

Analyse supplier contracts to determine the best rate based on historical consumption profiles.

Exception Reporting

Automatic energy alarms distributed by eSight report, Email or SMS text message.

Calculated Meters

Calculate plant efficiency, compare sub meters with a main meter or aggregate data.

Data Exchange

Allows the import and export of data in a large variety of formats.

Display Energy Certificates (DECs)

Construct display energy certificates in line with EU legislation, using our accredited module.

Benchmarking

Create benchmarking reports based on government or user defined standards.

Emissions Trading

Automatically manage CO₂ emissions in line with EU ETS legislation. Keep track of carbon trades.

Reporting

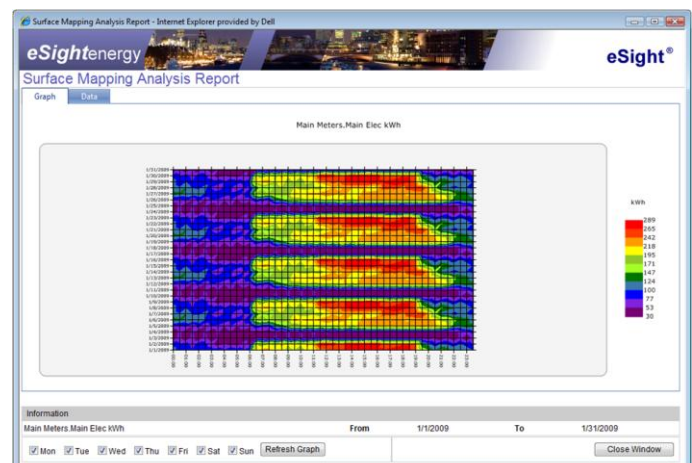

Use a variety of report templates which may be run against different companies, sites and meters.

Tenant Billing

Calculate energy consumption and subsequent billing of tenants across one or more sites. Generate bills on a scheduled basis.

Dashboards

Bring together essential energy information on a single page. Up to four screens may be viewed at once with automatic updates every minute.

Product Features

Fully Web Enabled Technology

eSight is a 100% web enabled solution, built using the latest web-based (.NET 2.0) technology.

This means that eSight:

- Only needs installing to a single location
- Can be accessed via the internet or intranet
- Only requires the Internet Explorer application to access eSight from the client PC
- Can be managed from a single central location thus making installation and ongoing maintenance simple and cost effective.

Scalable Architecture

eSight Energy has specifically designed eSight to be flexible and scalable and therefore suitable for use across organisations of any size and any industry sector.

eSight may be tailored to individual requirements both according to functionality via the modular design, but also according to the number of meters to be monitored.

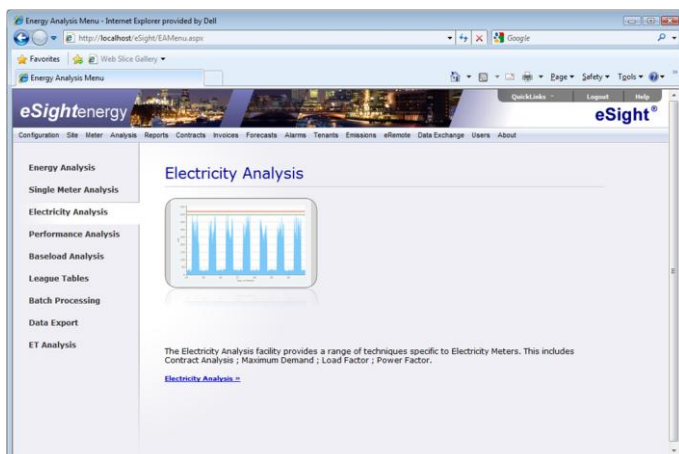

Intuitive User Interface

eSight is an extremely intuitive product. eSight Energy believe that our users should be able to access their energy data with ease. We believe that we have achieved this in eSight with a user interface which is exceptionally user friendly.

System Configuration

eSight provides the ability to easily set and maintain the system configuration parameters.

Administrators may define user rights to screen off data by company, site and even down to meter level. Menu options may be turned on or off and drop-down boxes may be edited by the user with ease.

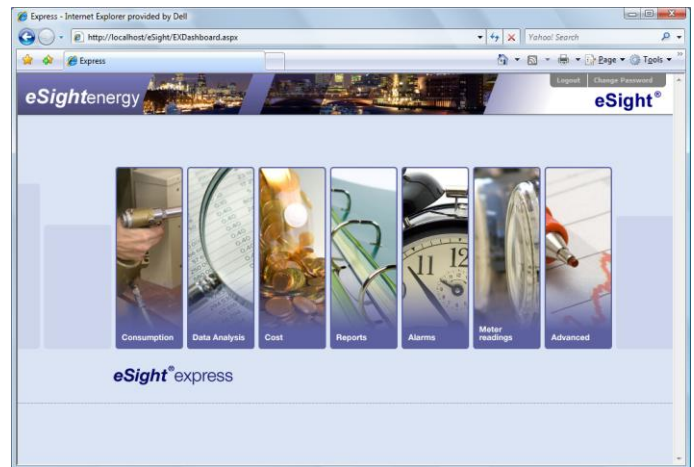

Data Import

Data may be automatically imported to eSight from a wide range of sources including data loggers, BMS or SCADA systems, electronic billing data and spreadsheets or manually if required.

Remote Data Transfer

eSight Energy provides a number of methods for transferring data from remote locations to eSight. Data may be transferred across the internet or intranet via FTP, modem, SMS and email. eSight Energy's Email stripper tool will automatically unpack data from an email and import it to eSight for analysis.

eSight Express

eSight Express provides a simplified window through to eSight, specifically designed with novice users in mind.

eSight Express enables users to perform basic energy and cost analysis, access energy reports and manage alarms. eSight Express combines the power of eSight, with the simplicity of an interface accessible by users at any level.

eSight Express may be branded to meet your corporate requirements.

eSight Language Packs

eSight is now available in a variety of languages including English, French, German, Spanish and Dutch. eSight express is also available in a variety of other languages.

Additional languages are available on request.
