

## PRESS RELEASE

### TORONTO-January 26, 2021

Yorkland Controls Limited has been named a **2021 Diamond Distributor** of **Honeywell's** commercial building controls. The prestigious honor recognizes the top-performing companies in Honeywell's Authorized System Distributors (ASD) program.

Distributors who participate in the Honeywell ASD program are evaluated annually across key metrics. To qualify for the Diamond Distributor program, companies must achieve a minimum sales volume during the prior measurement period, provide superior value-added customer services, and earn a top-10 score on the Diamond scorecard, which measures both business results and market behaviors.

"It's an honor to be named a Honeywell Diamond Distributor," said Gavin Barrett, President, Yorkland Controls. "The distinction is a testament to our team and the contractors we serve. This accomplishment would not have been possible without their continued business and our ongoing relationship.

"We have been named a Diamond Distributor, three consecutive years and look forward to the challenge of earning Diamond Distributor status again in 2022", said Gerry Cellucci, Vice President – Systems Solutions.

Yorkland Controls specializes in building automation systems, as well as commercial HVAC and combustion process control solutions. The company operates 6 branches located in Ontario and Nova Scotia.
