Yorkland New Supplier Announcement – Schneider Electric

SmartStruxure Lite solution – Integrated small to medium-sized building management system

Yorkland Controls Ltd is pleased to announce representation of SmartStruxure Lite by Schneider Electric.

Schneider Electric, a global specialist in energy management, has launched the “lite” version of its SmartStruxure solution, providing a fast way to future-fit and retrofit small to medium-sized buildings for HVAC control, lighting and metering.

With SmartStruxure Lite, users can save energy, gain efficiency, maintain a healthy and productive environment and access their building systems anytime, anywhere.

With the introduction of SmartStruxure Lite solution, small- to medium-sized commercial buildings now have an affordable building management solution to meet their needs.

By providing anytime, anywhere access to building information on a simple user interface, SmartStruxure Lite solution lowers energy costs without compromising on comfort.

As a simple web-based solution delivering one-click access to building system information, the product provides a single interface to connect HVAC, lighting and metering. It is customisable to fit the specific needs of the user’s facility and is a scalable, high-performance system based on open protocols.

Up to 60 percent of energy costs in a building are related to lighting and HVAC. This solution helps reduce energy costs and increase building performance while simplifying daily operations. It also provides users with remote access to their systems via a mobile device or the cloud.”

Aside from reducing installation time, labour and cost, it is a suitable retrofit solution for HVAC, lighting and metering applications. Optimal environmental comfort also increases employee productivity.

The product’s ecosystem delivers open system functionality from basic control up to the cloud. It consists of a wireless site manager/gateway, a universal controller, input/ output controller, VAV and room controller.

Yorkland Controls Ltd will be introducing SmartStruxure Lite through trained program contractors providing them the opportunity to use the system as a standalone “eco-control system” or an extension to a new or existing building automation system.
