

FOR IMMEDIATE RELEASE

Yorkland Controls Limited and Wiles-Legault Join Forces

Toronto/Ottawa – February, 2016

Yorkland Controls Limited announces the acquisition of Wiles-Legault of Ottawa, Ontario, with the aim of providing customers “top-in-class” HVACR control parts and systems solutions for the Ottawa Region.

Wiles-Legault will become a business unit of Yorkland Controls Limited with the current operations remaining under the direction of Mr. Ron Gravelle.

Combining the strengths of Wiles-Legault and Yorkland will provide customers with wider access to a full range of products, solutions and services - backed by technical and application support staff. The acquisition of Wiles-Legault will enable Yorkland Controls to further develop the Ottawa market, and support an increased product portfolio, including control parts, building automation, heating, and combustion systems.

According to Mr. Gavin Barrett, President of Yorkland Controls, “Wiles-Legault is a leader supplying control parts, systems and services to the Ottawa and surrounding region. A strong and trusted supplier in the industry, Wiles-Legault is known for delivering superior service and support. We welcome them to the Yorkland team. The acquisition also adds to Yorkland’s capacity and geographic presence to warehouse, supply and support our extensive control offering.

“We are very excited about this new phase of Yorkland’s plan to expand our presence to all areas of the Canadian controls market.”, according to Gerry Cellucci, Vice President of Yorkland Controls.

About Wiles-Legault

Since 1965, Wiles-Legault has been the leading wholesaler of control parts and systems and offering technical support, training and control panel services for the greater Ottawa Region. Representing some of the leading supplier bands, Wiles-Legault has a reputation for having product available for the market needs and offering superior customer support.

About Yorkland Controls

Yorkland Controls Ltd. is a HVACR parts, building controls and automation distributor serving the market place for over 45 years. Yorkland represents leading brands of control suppliers. Yorkland provides a high degree of value added services, including technical support, wide range of available stock, design, and field support. Working through qualified contractors, we facilitate solutions by designing and supplying combustion systems, energy and analytics software, building automation, and integration to lighting and access control.
